

## Proper Thawing of Frozen Product

**Freeze**  
10° F or lower

Single serve portion juices have a shelf life of one year when stored frozen at 10° F or lower.

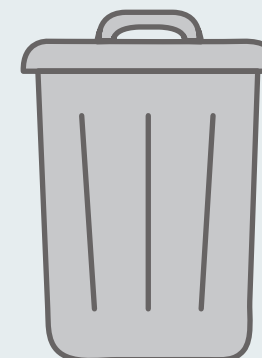

**Refrigerate**  
34-38° F

Upon removal from frozen storage, juices should be thawed and stored under refrigeration (34° F to 38° F).

Follow best practices of rotating product: first in, first out

**14 Days**

For best quality, use all portion juices within 14 days of the initiation of thawing.
